Space & Serenity Move360™ Move Coordination Package

Confusion and disarray during the moving process can put undue stress on you or your family. Allow Space & Serenity to negotiate the logistics of moving with our **Move360™ Move Coordination** services. This includes sorting and consolidating, donating, packing prep, managing the movers, unpacking, and setting up your new space. Our managed approach minimizes the disruptions you or family experience during transition.

Having a single company coordinate all stages of your move provides a streamlined, economical one-stop solution, so you can settle into your new space immediately. The serenity is in the details.

All move coordination projects begin with a complimentary consultation. This sets the stage to build trust in one another and is designed to cover every detail of your move: time and budget constraints, locations, items to be moved, and special considerations. Then we decide on the best solution for you.

Solution #1
